

## PRESS RELEASE

### **FEFANA launches its “Virtual Library” and publishes a Booklet on Premixtures**

**Brussels, 6<sup>th</sup> May 2013 - FEFANA is pleased to announce the launch of the new FEFANA “Virtual Library” which coincides with the publication of a Booklet on Premixtures**

Being the technical expert on Specialty Feed Ingredients and their Mixtures, FEFANA aims at providing technical and scientifically sound information on the benefits and safety of the products of its industry.

A new interactive “Virtual Library” space has just been created on the FEFANA website at: <http://www.platform-fefana.org/Website/Booklets> on which our publications will be available.

FEFANA particularly foresees the release of a series of specific booklets related to different categories of products. The [Booklet on Premixtures](#) is the first of these intended publications.

The premixture sector has greatly developed over the last decades and is regarded as a key partner for the compound feed industry, farmers and other feed business operators. The FEFANA Working Group on Premixtures has designed and developed this booklet to draw an overall picture of the European premixture industry. A description of the various types of premixtures is given first, followed by sourcing and procurement process of premixture ingredients, their formulation, manufacturing, packaging and transport. The final focus is on the quality management and safety of premixtures.

For more information please contact the FEFANA secretariat at [info@fefana.org](mailto:info@fefana.org) or visit our website at [www.fefana.org](http://www.fefana.org).

#### **About FEFANA**

*FEFANA - the EU Association of Specialty Feed Ingredients and their Mixtures - is the united voice of the specialty feed ingredients industry in the European Union. With more than 100 Members from 28 countries, it is the organization representing the interests of the specialty ingredients industry that enter the food chain via feed. Manufacturers and traders of feed additives, functional feed ingredients, premixes and other mixtures of specialty ingredients are amongst our member companies. The association is the interface between the additives and functional ingredients industry and the European Union authorities, including Member States authorities, in order to promote, safeguard and defend common and general interests of its industry.*
